

Finding Hospitals and Police Station In India

Krushnna Baviskar (July 7, 2019)

India is a Developing Country so that in emergency for example if any accident happen so it is always difficult to find out Hospitals ,and Police station Near by any Emergency Location

And it is not only limited for emergency situation but in rural area also facing same problem to overcome this problem and in business perspective to make money by solving this problem is Possible Using Foursquare API.

For the project objectives to be achieved, python geolocation libraries will be used, along with the Foursquare API. Also, in order to create clusters of similar candidate locations, the KMeans machine learning clustering algorithm will be used.
